iRoom's iBezel combines the most elegant, motorized iPad® in-wall charging station while simultaneously controlling your favorite home automation application through a simple touch on the iBezel. As an accessory to any complete home control system, iBezel represents the most universal and intelligent touch panel for the next generation. This combination enables the iBezel to work with major* control systems, offering professional wireless touch functionality through the iPad®, paired with immediate access to hardwired keypad controls.
